

MiVoice Business Dashboard

The right information for the right decisions

Mitel® MiVoice Business Dashboard gives you a complete real-time and historical view of what is happening on your Mitel communications system so that you can improve business processes, performance, and identify opportunities for cost savings.

MiVoice Business Dashboard consists of the following modules:

BUSINESS DASHBOARD SERVER

MiVoice Business Dashboard connects your computer network to the MiVoice Office 250 platform. It monitors all internal and external calls, 24/7, providing the data needed for the other MiVoice Business Dashboard modules to report call information and display real-time statistics.

REPORTER

Reporter is a powerful and comprehensive report generation tool that provides both historical and real-time reports on all incoming and outgoing calls. It produces concise and simple reports on trunk and extension related activity such as call costs, trunk usage, and traffic patterns. Reports are fully customizable and can be created at the enterprise, department, or even individual employee level.

REALVIEWER

RealViewer brings real-time business performance to the individual users or team leader's desktop for optimum operational efficiency. Multiple tiles can be built to display selected statistical information globally or across groups and individuals. There are over 200 different statistics to choose from, each of which can be individually filtered.

CONNECTION ASSISTANT CLIENT

Connection Assistant Client is an advanced call management tool that provides telephony call control, screen popping, automated dialing, and enhanced call control for increased employee efficiency. Both inbound and outbound calls can be screen popped displaying caller details from the company's database.

REPORTER FEATURES

- *Historical and real-time reporting for both internal and external call traffic*
- *Cradle-to-grave call reports for tracking and monitoring*
- *Basic call costing*
